

# PRATEEK GUPTA

Data Analyst | Power BI · SQL · Python · Excel | 2.5 Years Enterprise BI Experience  
prateekgupta545@gmail.com | +91-8074780272 | [LinkedIn](#) | [GitHub](#) | Bengaluru, India

---

## PROFESSIONAL SUMMARY

---

Data Analyst with hands-on experience building Power BI dashboards, writing SQL queries, and delivering data-driven insights in a live enterprise environment. Delivered end-to-end BI project covering ETL pipelines, DAX modelling, and executive reporting across large real-world datasets. Experienced in CRM analytics, pipeline reporting, and cross-functional stakeholder communication across Sales, Operations, and Product teams. Certified in Microsoft Power BI (2026) and currently pursuing PL-300.

## TECHNICAL SKILLS

---

- **BI & Visualization:** Power BI, DAX, Power Query, Data Modelling, KPI Dashboards, Interactive Reporting, Tableau
- **Data & Analytics:** SQL, MySQL, Advanced Excel, ETL Pipelines, Data Cleaning, Data Transformation, Business Statistics
- **CRM & Reporting:** Salesforce CRM, Pipeline Analytics, Funnel Analysis, Forecasting, Trend Analysis
- **Cloud & Tools:** Azure, AWS, Git, GitHub, Salesforce Cloud
- **Programming:** Python (Pandas, NumPy, Matplotlib, Seaborn), Exploratory Data Analysis

## PROFESSIONAL EXPERIENCE

---

**Data Analyst | Ambient.ai, Bengaluru**

*Jul 2023 – Apr 2026*

- Designed and Maintained Power BI dashboards tracking pipeline KPIs and SDR, AE's and SE's performance analytics across enterprise physical security accounts — enabling Sales leadership, SDRs, Operations, Product, and Data teams to self-serve real-time insights and reducing dependency on manual reporting.
- Wrote **SQL queries** to extract and transform large datasets, automating recurring data pulls for dashboard pipelines and supporting Data Engineers in maintaining clean, reliable data flows across reporting systems.
- Collected, cleaned, and validated data from multiple structured and unstructured sources using **Python (Pandas)** and SQL — delivering analysis-ready datasets for both internal reporting and Data Science consumption.
- Defined KPIs and data collection standards in collaboration with cross-functional teams across Sales, Product, Operations, Data Engineering, and Data Science — creating a single source of truth for performance tracking.
- Collaborated with Data Engineers and Data Scientists on an occasional basis to align on data definitions, pipeline dependencies, and analytical outputs — ensuring consistency between upstream data infrastructure and business-facing dashboards
- Delivered findings through clear presentations and reports tailored to **non-technical stakeholders and C-suite leadership**, enabling faster, data-driven decisions across the business.

## DATA ANALYTICS PROJECTS

---

### Finance & Banking Analytics Dashboard — *Tools: Power BI, Power Query, DAX, Excel, SQL*

- Built an end-to-end Finance Analytics Dashboard for **baking partner** in Power BI to monitor financial transactions, customer segment performance, and regional profitability across 5 customer segments (Retail, Premium, SME, Corporate, Wealth) and 10 transaction types — enabling stakeholders to replace manual reporting with real-time self-service insights.
- **Designed KPI framework** tracking Total Transaction Value, Average Transaction Value, Total Fees, Total Tax, and YoY Growth — giving finance leadership a single source of truth for **performance monitoring and strategic decision-making**.
- Wrote MySQL queries to extract, validate, and transform raw financial transaction data before loading into Power BI — ensuring data integrity across the full **ETL pipeline** from source to dashboard.
- Implemented advanced **DAX measures** and a **star schema data model** in Power BI; built dynamic measure selection, **drill-through reports**, and multi-dimensional slicers (Year, Occupation, Category) enabling non-technical users to self-serve analysis across millions of transaction records.
- Surfaced transaction success vs. failure rates, identified top-performing states and customer segments by revenue contribution, and tracked fee and tax collection trends — delivering actionable intelligence to support risk and profitability decisions.

### CRM Sales Performance Analytics Dashboard — *Tools: Power BI, Power Query, DAX, Excel, Salesforce CRM*

- Built an interactive Power BI dashboard **analyzing \$10M+ in B2B sales pipeline data** across accounts, products, and sales teams, enabling stakeholders to track performance without relying on the raw CRM platform.
- Engineered a multi-page sales analytics dashboard (Executive Overview, **QoQ Growth**, Revenue, Deal Size, Won Deals, **Product Analysis**) using Power Query for **data transformation** and DAX for custom KPI measures.
- **Identified a 63% opportunity win rate** across 4,238 won deals by building dynamic KPI scorecards, slicers, and quarter over quarter growth visuals for sales leadership.
- **Modelled CRM opportunity data** (accounts, products, sales reps, deal stages) into a clean relational structure in Power BI to support self-service **business intelligence reporting**.
- Analyzed product-line performance by revenue, deal count, and average deal size to identify which hardware product series drove the most profitable deal.

## PRIOR BACKGROUND

---

*Earlier roles in analytics, market research and intelligence, and data quality across B2B environments (2019–2023):*

**Prove Identity** — Market Research Analyst

*Oct 2022 – Jun 2023*

**Wavteq** — Business Intelligence Research Analyst

*Apr 2021 – Sep 2022*

**Silicon Media Technologies** — Market Research Executive

*Jun 2019 – Mar 2021*

## EDUCATION

---

**B.E. — Electronics & Electrical Engineering** | RGPV, Bhopal | 2016 | GPA: 80.5% (A+)
